

PRESS RELEASE

Alpha, Delta and Theta – the new enforcement from IsoTek SMART Power gives absolute control into the hands of the installers!

For Immediate Release, February 2018 - IsoTek SMART Power will be showcasing its innovative product line at the ISE 2018 (Booth no. 15-T295), at the RAI Amsterdam from 6-9 February. IsoTek SMART Power brings the company's power cleaning know-how into a full user/installer controlled environment. There are three models in the current IsoTek SMART Power Range, these being Alpha, Beta and Theta. Each model has a higher level of power cleaning technology combined with full programmability through an RS232 interface or smartphone application, which can connect via LAN or Bluetooth.

ALPHA - A discreet 1U (44.5mm) high rack width component, offering full system control of connected electronics through RS232, LAN, and through a secure online interface and dedicated codex for Control 4 and Crestron. Alpha features eight C14 IEC output sockets along with RS232 via traditional and USB ports, LAN Ethernet port for WiFi control and antenna supporting Bluetooth. Alpha protects connected equipment up to 40000A. Input power is via standard IEC C15/16 connection. Alpha is also available as a non-programmable option.

DELTA - A 2U (89mm) high rack width component, offering full system control of connected electronics through RS232, LAN, and through a secure online interface and dedicated codex for Control 4 and Crestron. Delta is available in two model types, one which features six UK (BS 1363), European Schuko or American 3-

pin output sockets, the second with 16 C14 IEC. Beta also features RS232 connection via traditional and USB ports, LAN Ethernet port for WiFi control and antenna supporting Bluetooth. Input power is via 16A IEC C19/20 connection. Delta also reduces Differential and Common Mode mains noise. Each output socket is independently cleaned avoiding mains noise -contamination between connected electronics. Delta protects connected equipment up to 54000A.

THETA - A 2U (89mm) high rack width component, offering full system control of connected electronics through RS232, LAN, through a secure online interface and dedicated codex for Control 4 and Crestron. Theta features six UK (BS 1363), European Schuko or American 3-pin output sockets along with RS232 via traditional and USB ports, LAN Ethernet port for WiFi control and antenna supporting Bluetooth. Input power is via 16A IEC C19/20 connection. Theta also features a sophisticated circuit to remove both Differential and Common Mode mains noise from each output socket stopping mains noise -contamination between connected electronics. Theta protects connected equipment up to 67500A.

Featured Specifications:

- RS232, LAN, and over Wifi through a secure online interface and dedicated codex for Control 4 and Creston

- Grouping of multiple models into a named controllable group
- Fully remote controlled sequential programmability, and restart ability for each outlet socket
- Full power cleaning of Differential and Common Mode noise
- Full connected component protection

IsoTek SMART Power will allow installers to work with clean power for a much better quality in Audio and Video for smart home or similar installations. Units can be combined, named in controlled as a group – the smallest or the largest, this facility being ideal for larger installation where independent socket control or sequential start up is critical.

IsoTek SMART Power represents the next significant step forward for this power-conditioning specialist. IsoTek is already a solidly established international brand name in the area of two-channel audio with a multi-award-winning reputation. The company's existing technology already covers a range of passive power cleaners a all price points, full mains sine wave regenerators, a series of power cables and useful accessories.

About IsoTek SMART Power

IsoTek SMART Power is the latest range of power optimisation products by IsoTek, these being specifically targeted at the custom installations market. IsoTek SMART Power evolves from the multi-award-winning IsoTek brand. The goal of SMART Power is to enabling installers to work with clean power technology for better customisable control, greater reliability and better performing Audio and Video installations for today's smart homes.

About IsoTek

The IsoTek brand delivers award-winning power optimisation products for hi-fi and home cinema systems, with over 100,000 customers in over 45 countries. IsoTek has earned numerous accolades from specialist audio and AV publications worldwide and was voted most innovative brand in the Home Entertainment category at the PLUSX Awards, Germany 2016.

IsoTek was born with a singular aim: to create a better solution to the problem of poor mains quality, which restricts the performance of audio systems, through rigorous research and genuine innovation
